Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakamoto (JP 04/185933).

Regarding claim 7, Sakamoto discloses an information recording medium in which a content in the form of time series data is recorded, comprising: a first area in which the time series data are recorded (see figure 1, abstract, and paragraph 0018 and 0028); and a second area in which a time sequence index information group and a reverse time sequence index information group are recorded, the time sequence index information group containing index information items, which are extracted from the time series data for locating particular points of the content, arranged in time sequence of the time series data, the reverse time sequence index information group containing the index information items arranged in reverse time sequence of the time series data (see paragraphs 0012, 0020, 0022, 0027, claim 5 and abstract).

Regarding claim 8, Sakamoto discloses the first area and the second area are adjacent to each other (see figure 1 and paragraph 0028).

Regarding claim 9, the information recording medium, wherein the second area is adjacent to a Lead-In area located at the top of a recording area where predetermined data containing the time series data are recorded or a Lead-Out area located at the end of the recording area (see paragraph 0028).

Claim Objections

3. Claim 9 is objected to because of the following informalities: the phrase "as claimed in claim 7" should be inserted on line 2. Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-6 and 10-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to an information recording device and method for recording content on an information recording medium. Independent claims 1 and 10 identify the uniquely distinct feature "**an index information group recording unit that records the time sequence index information group and the reverse time sequence index information group created by the index information group creating unit into an area of the information recording medium different from an area where the time series data are recorded.**" The closest prior arts Sakamoto (JP 04-185933), Miyazaki (JP 07-155189), La (US Pat. No. 7, 437, 059) either singularly or in combinations fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HELEN SHIBRU whose telephone number is (571)272-7329. The examiner can normally be reached on M-F, 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, THAI Q. TRAN can be reached on (571) 272-7382. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
